

Training With Purpose

**BPI® REVIEWED
CURRICULUM and
TRAINING RESOURCES
FOR EDUCATORS**

PROGRAM OVERVIEW

Common sense lends to the understanding that not all training programs are alike. At Energy Conservation Institute™ our focus is in on developing training programs with a defined purpose - prepare students for BPI® certifications. By providing high quality BPI® reviewed curriculum and exclusive training resources for purchase, our programs are designed to assist your organization in preparing students for various BPI® certifications including Building Analyst, Building Envelope Professional, and Heating and AC/Heat Pump Professional.*

Following BPI® Technical Standards, our training provides a focused approach to understanding key issues affecting health and safety, comfort, and energy consumption. We have carefully designed each training module to ensure key subjects are well illustrated and presented in a manner supportive of subsequent hands-on training and BPI® written and field certification testing.

Through an innovative and quality driven approach, our exclusive programs are designed for organizations seeking to develop sustainable green workforce education programs that result in BPI® certifications. Content can be delivered in print, electronically, or a combination of both. For established providers, reseller opportunities are also available.

- Site Inspection and Interviews
- Appliances and Lighting
- Combustion Safety
- Using a Blower Door to Measure Air Leakage
- Identifying Air Leakage Paths
- Air Sealing Considerations and Calculations
- Ventilation
- Insulation Best Practices
- Duct Testing and more...

GUTS™ ONLINE PROGRAM

Our exclusive GUTS™ (Get Up To Speed) Online Learning Program was designed to help prepare students for multiple BPI® certifications. Through professionally developed and narrated presentations, students are introduced to real world equipment, procedures and scenarios prior to attending classroom or field studies. The result is a learning experience like no other.

Professionally Narrated Modules

With over six hours of narrated instruction covering each module in the printed Student Lecture Guide, students completing the GUTS™ program find themselves well prepared for BPI® written exams and field or OTJ training.

Detailed Progress Reports

Why wait until it is too late to ensure your students are ready to move forward? With the GUTS™ student progress report system, instructors now have the opportunity to monitor and encourage students during the learning process. The result is a more focused, well vetted group of students prepared to take their next step in training.
